Experience

1. Aug 09, 2021 - Present

Deloitte Consulting, Bangalore

Roles & Responsibilities

- Building comprehensive web platforms which are used by our clients in different markets. I have used React, NextJS, HTML, CSS, Bulma CSS, Tailwind, TypeScript and Javascript for building the front end application.
- Building reusable components which helps the team in building the application faster and bug free code base.
- Worked on different projects where we helped our clients to restructure/redesign their web platform. Worked on Micro front end architecture using React, NextJs, Typescript and other latest cutting edge technologies. We are consuming backend API written in Java micro services.
- Have experience in working with Analytics for the application, writing test cases using Jest and RTL, integrating AEM content fragments and performance optimization.

2. Feb 03, 2020 - July 22, 2021

Dell Technologies, Bangalore

Roles & Responsibilities

- Building and maintaining web platforms which will be used by partners in both web version and mobile version. I have used React, HTML, CSS, Javascript, Material UI for building the whole front end application. I have used Node, a javascript runtime for running server applications to write the backend API's which are consumed by the Front end.
- I have worked as a Full Stack developer on 3 end-to-end applications from Building the Applications, testing in different environments, deploying the application in windows servers and maintaining the same.

3. Nov 15, 2015 - Jan 24, 2020

TCS, Bangalore

Roles & Responsibilities

- Building a web platform which will be used by clients in both web version and mobile version. I have used React, HTML, CSS, Javascript, Material UI for building the whole front end application. We have used GraphQL to write the backend API's which are consumed by the Front end Application.
- I have worked as a Front end developer in 2 projects where I have worked from Building the Front End, testing in different environments and maintaining the same.
- I have worked as a Support engineer for 1 project where my responsibilities included developing and maintaining internal tools for clients. Managing the day-to-day activities and to keep up the application availability (99.94%) and performance as per SLA.
- I had taken initiative to improve the User Experience of Client's Portal.
- I have worked as an Assistant System engineer trainee in 1 project where I have worked on building an online payment portal for Amex. The project had three modules: customer registering module, foreign exchange module and online shopping using redeemed. I have used Java for building the application and Database as Oracle.
